F-1100MAH  
B-700

### 7 Design Features that Make Hoshizaki Ice Machines the Industries Best!

- Solid Anti-Magnetic Stainless Steel Auger
- Sealed Gear Housing and Graphite Sleeve Bearings
- Hard Dry Flaked or Cubelet Ice
- Solid State Controls and Dual Float Assembly
- CleanCycle I2® Design 
- Fewer Moving Parts
- H-GUARD Plus Antimicrobial Agent 

Hoshizaki America, Inc.

# FLAKER / CUBELET SERIES

## Ice Machines & Dispensers

### INTERNAL AUGER DESIGN BENEFITS

- Dual flight auger to evenly distribute load, reduces torque in gear box
- Anti-magnetic auger and barrel reduces mineral build up
- Heavy duty ventless gear box
- Excellent efficiency results, low kilowatt consumption
- Hardened bearing surface on auger to extend life of bearings
- Spring loaded ceramic mechanical seal
- Spline cut alignment to insure balance
- Greaseless water friendly graphite bearings increase longevity
- Simple auger access

### EVAPORATOR BARREL

- Durable anti-magnetic stainless steel freezing cylinder
- Refrigerant tubing is insulated within the foamed in place polyurethane; tight sealed foam reduces condensation and water penetration
- Ice is moved upwards through the extruding head, squeezing out water
- Produces hard, dry flaked or cubelet ice

### DUAL MAGNETIC FLOAT SWITCH

- Top float controls water supply
- Bottom float protects machine with low water safety shutdown
- Results in equal water level in evaporator allowing consistent ice shape and hardness

**Hoshizaki Flakers, Cubelets, DCM and DT Ice Machines are Backed by our Warranty**

- **Three Year** - Parts and labor on entire unit (Serial nos. Vxxxxx) and after; Excludes C-100B Models)
- **Five Year** - Parts on compressor and air-cooled condenser
